

National Severe Weather Warning Service

Chief Forecasters Assessment

Showers will develop on Tuesday and are likely to become locally heavy and thundery in the afternoon and evening giving 10 to 15 mm in an hour and perhaps 20 to 30 mm in 3 hours or less. The showers are likely to persist well into Tuesday evening. As often happens in showery situations some areas will miss the showers.

The Met Office have issued a **Yellow Warning of Rain**

Valid from **12:00 on Tue, 12th Jun 2012** until **23:55 on Tue, 12th Jun 2012**

Showers are likely to become heavy and locally thundery over parts of Wales and southwest England on Tuesday. The public should be aware that these could lead to localised surface water flooding. This is most likely over west Wales where, following recent heavy rain, the ground is saturated and so there is also a low risk of river flooding.
